

ADVANCED ELECTRICITY METERING PLATFORM ADVANCES OPERATING PERFORMANCE

Honeywell's advanced metering platform for electric utilities is designed to generate actionable enterprise intelligence in real-time for more informed decision making and faster action taking.

Decreased Downtime Powers Increased Efficiency

At Honeywell, we're focused on delivering end-to-end solutions that help electric utilities thrive by delivering exceptional measuring, monitoring and automation capabilities. Our advanced metering platform works in residential, commercial and industrial applications using open standard, public wireless networks. This maximizes the operational benefits of connectivity and personnel bandwidth while helping reduce costs.

A Smarter, Safer, More Connected Network

CONNECT TO MOST NETWORKS

ENHANCED SAFETY AND SECURITY

REAL-TIME DATA ACCESS

INCREASED PROCESSING CAPABILITIES

Our advanced metering platform has been designed to help electric utilities navigate the challenges created by grid modernization. We believe a smarter network is part of a smart solution.
