

ENCORE FC1 BASIC COURSE

| Honeywell PMC Academy

COURSE OVERVIEW

The Level 2 course is designed to provide fundamentals about gas volume conversion and the operation, commissioning, maintenance and basic troubleshooting of encore FC1 flow computers.

The course aims to equip End User Engineers with the essential tools to ensure the reliability and accuracy of using encore FC1 flow computer in fiscal gas metering applications.

Course Duration: 2 Days

TARGET AUDIENCE

The course targets technicians, maintenance engineers and auditors involved in gas measurement using encore FC1 flow computers.

COURSE DELIVERY

Instructor Led training

KEY LEARNING OBJECTIVES

Participants will learn to

- Fundamentals of volume conversion
- Design, features and applications of enCore flow computers
- Installation and handling of configuration software, enSuite
- Online/Offline parameterization in normal mode
- Commissioning & best practices
- Diagnose common issues effectively
- Basics of Data analysis
- Calibration options
- Firmware and hardware upgrade options

HANDS ON TRAINING

Participants will engage in practical exercises, including calibration, and basic troubleshooting simulations.

NOTES

Please bring your own notebook.
Administrations rights required to install enSuite
