

# **SAFETY SUITE** **ADVANCED OPERATION**

## **| Honeywell PMC Academy**

### **COURSE OVERVIEW**

This course equips participants with advanced skills for effectively configuring using the Honeywell safety suite across its various packages, including Deluxe, and Premium. The course encompasses a comprehensive overview of key modules such as Device Management, and Real-Time features like live alerts and multi-site management. Through hands-on exercises and practical applications, attendees will learn how to optimize system functionalities for improved safety management and compliance, ultimately enhancing operational efficiencies within their organizations.

By the end of the course, learners will have the practical skills necessary to operate the Safety Suite Plant Deluxe and Premium package software confidently.

### **COURSE DURATION**

- 1 Day

### **PREREQUISITE COURSES**

Safety Suite Plant Standard must be Known and needs to install in students' machine

### **TARGET AUDIENCE**

The course targets the operator, supervisor, and Maintenance Engineers.

### **COURSE DELIVERY OPTIONS**

Instructor Led Training

### **HANDS ON TRAINING**
