

BW SERVICE TECHNICIAN 1 YEAR COMPETENCY PROGRAM

| Honeywell PMC Academy

COURSE OVERVIEW

1 Year BW Service Technician – Remote Work Force Competency program is an outcome-based training created for those seeking expert knowledge and leadership in gas detection. It provides continuous learning, develops collaboration. It includes in-depth training on service maintenance, calibration, and fault identification, making it often ideal for service providers and safety leaders.

By the end of the program, learners will have the practical skills necessary to Calibrate / repair / trouble shooting identification of the BW by Honeywell portable range of gas monitors
