

# ENTIS OPERATION ADVANCED MOVEMENT

## | Honeywell PMC Academy

### COURSE OVERVIEW

This course provides foundational training focused on the practical operations of ENTIS. The system is built on the Experion foundation.

It features an operator workspace that facilitates tank inventory management and monitoring, event handling, alarm acknowledgment, alarm silencing, and product movement.

It enables participants to have the practical skills necessary to operate the ENTIS System using the station effectively. The specific version of ENTIS used for training will be determined by the participants' needs.

### COURSE DURATION

2 ½ Days

### COURSE DELIVERY

Instructor Led or Remote Instructor Led delivered in two working days.

### PRE-REQUISTE

None, introductory training

### COURSE DELIVERY OPTIONS

Instructor Led or Virtual Instructor Led Training (VILT). VILT is a training method by which an instructor conducts remote live, interactive sessions using Microsoft Team software.

### TARGET AUDIENCE

The course targets the operators and operations supervisors involved in managing the operations of Tanks using ENTIS.

### KEY LEARNING OBJECTIVES

Participants will learn to

- Perform the basic functions of ENTIS.
- Perform and manage the basic and advanced movement functions of the Product on the ENTIS station.
- Understand the concept of Totalizers to ENTIS.
- Perform the What-If Analysis.
- Perform inventory calculations in compliance with API and ASTM.
- Visualize and Manage the Alarms, Events, and Trends.
- Create a Product using the Product Editor and understand the CIU settings, if applicable.
- Generate different types and different formats of Reports using templates to generate professional reports.

### HANDS ON TRAINING

Participants will engage in practical exercises. If VILT training is chosen, students practice in their respective virtual machines using a simulated environment. Participants are expected to share their screens online and show the output of lab exercises.
