INTRODUCTION

Honeywell offers Work Force Competency which is timebound and measurable training program.

It focusses on skill development, work force can assess their skills, and Honeywell offers guided learning journey to meet your goal through multiple elements like training courses, upskill session, connect with expert and maintenance assist.

Following competency program are provided

- 1 Year ENTIS Operator Program
- 1 Year TGS Beginner Maintenance Engineer Program
- 1 Year TGS Advanced Maintenance Engineer Program
- 1 Year TGS Beginner Project Engineer Program (Honeywell Partner Only)
- 1 Year TGS Advanced Project Engineer Program (Honeywell Partner Only)

Work Force Competency program is a subscription with a time bound. It has following features

- **Comprehensive Learning Journey**

The program begins with an engaging classroom session that features hands-on training with our products. This immersive approach ensures that participants acquire the necessary skills and knowledge effectively.

- **Continuous Assessment**

Following the initial training, a thorough assessment evaluates the candidates' comprehension of various key parameters. Each trainee receives a detailed evaluation report based on their performance in these competencies.

- **Targeted Competency Levels**

Specific competency targets can be established for each individual. If a participant does not reach the predetermined level, an Upskill Session will be provided, offering an additional opportunity for improvement.

- **Re-assessment Opportunity**

After the Upskill Session, students can be re-assessed, and if necessary, their competency reports will be updated to reflect their progress.

- **Dedicated Support Services**

To ensure our trainees receive the best possible guidance, an additional support system, comprising various support services, is available for all participants.

PROGRAM SUBSCRIPTION OPTIONS AND ELEMENTS

Basic, Enhanced and Premium

Subscription options are available for selection and the below table specifies the elements available in each subscription.

Course

Well defined courses are defined for each product and some products has multiple courses included in the program.

Assessment and Competency Report With the assessment an overall evaluation of the student is created in junction with a Competency Report. Competency Report allows to identify the essential skills delivered within the Course and how the student performs on every skill. The Competency Report contains a graphical representation of Student Skills' evaluation in relation to Honeywell defined standards. Assessment and Competency report are performed after Classroom and after Upskill sessions.

Upskill Session

Students attend 3 hours remote Upskill session after the assessment if a specific level is not met or if the overall evaluation is not acceptable. Upskill sessions, Reassessment, Competency Report have a limit based on the selected program duration.

Recertification

Student has a 2-year valid Certificate for every Training Course completed with a positive assessment. At the expiration of Certification, the students

PROGRAM DURATION	1 OR 2 OR 3 YEARS		
Subscription Elements	Basic	Enhanced	Premium
Learning
