Morning Pride Pro Fit Pant

Morning Pride quality with a modern and stress-free fit

Take comfort to the next level with our new Morning Pride® Pro Fit Pant. This new design combines the best of both worlds – the tailored professional fit you have come to expect from Morning Pride, along with improved mobility through a more modern fit. It's still a Morning Pride pant, so you can trust the high quality and durability, and of course find a rich selection of optional features.

The innovation on the Pro Fit pant isn't just that we lowered the front to sit at the hips, for the most preferred fit today. We also realigned the rest of the pant for a less bulky crotch, a properly aligned knee position that eliminates knee roll, and reduced cuff retraction. You'll feel the difference in the ease of movement, eliminating stress and making your job easier.

The Morning Pride Pro Fit is available in all fabric composites, with most options offered in the current Morning Pride TAILS line. The base garment comes standard with the following:

- Kevlar®-lined bellows pockets with 3:1 hook and pile, and easy grip
- Half-angle cuffs with Ara-shield® trim
- Narrow fly with hook and pile, and reverse hook on tab
- Take-up straps

NFPA 1971 certified

Model: MPL

Lower waist in front while keeping enough coverage in the back (NEW)

Full range of motion crotch
