

## **TECHNICAL BULLETIN #123**

SUBJECT: 905700 PORTABLE TEST CONSOLE

(PTC)

DATE: 7/06/04

PRODUCT AFFECTED: 905700 PORTABLE TEST CONSOLE

(PTC)

This Technical Bulletin is to inform all Survivair users that the 905700 Portable Test Console (PTC) will no longer be supported by Survivair after December 30, 2004. The regulatory requirements of NFPA 1852 and availability of repair parts for the PTC have led to our decision to end repair and calibration support for this product.

After December 30, 2004 only a properly maintained and calibrated Biosystems PosiChek<sup>3</sup> used in conjunction with Survivair-specific software will be acceptable for testing Survivair SCBAs and SARs.
