

# DEVICE MANAGEMENT REIMAGINED FOR SAFETY TEAMS

Honeywell Safety Suite 2.0

### **A COMPREHENSIVE SOLUTION FOR GAS DETECTION FLEET MANAGEMENT**

Safety Suite 2.0 brings together gas detector data, workflows and reporting into a connected platform designed to support portable gas detection programs across sites.

The platform supports BW and RAE devices and provides a centralized way to monitor device status, manage assignments and review compliance related data through a modern interface.

- Streamline the oversight of to make sure they are within compliance with industry and site standards.
- The intuitive design of Safety Suite 2.0 reduces training time and increases the efficiency of your safety management operations.

### **STREAMLINED WORKFLOWS THROUGH GUIDED SETUP, DASHBOARDS, AND REPORTING**

Honeywell Safety Suite 2.0 is an integrated software system that offers you the ability to enhance workplace safety and operational efficiency. By providing a comprehensive platform for device management, safety monitoring, and compliance tracking, Safety Suite 2.0 empowers organizations to create safer, smarter, and more efficient work environments.

### **CONNECTED DEVICE AND WORKER MANAGEMENT**

Safety Suite 2.0 expands device management by pairing onboarding and assignment workflows with visibility into device usage and status. Guided onboarding, worker assignment dashboards, and configurable views support day-to-day fleet activities while providing traceability across devices, workers, and sites.

### **OPERATIONAL VISIBILITY AND PROCESS CONSISTENCY**

Safety Suite 2.0 supports operational visibility by bringing fleet, worker, and compliance information into a single platform. Dashboards and scheduled reports provide timely access to data, while built-in workflows support consistent execution of routine safety and compliance tasks across locations.

# INCREASE PRODUCTIVITY AND SIMPLIFY COMPLIANCE

## IMPROVED COMPLIANCE

Staying compliant with safety regulations is crucial for any organization. Safety Suite 2.0 supports compliance activities through configurable reporting, audit-ready records, and visibility into device and worker data. Dashboards and exportable reports help teams review compliance status and document activities across sites. The system's detailed reporting and audit trails provide clear documentation of compliance efforts, making it easier to demonstrate adherence to regulatory requirements.

## ALSO AVAILABLE IN ESSENTIAL, STANDARD AND STANDARD+

Safety Suite 2.0 plays a key role in supporting worker safety by connecting device data, assignments, and compliance information within a single platform. By providing visibility into how devices are used across teams and sites, the platform helps safety teams monitor conditions, identify potential gaps, and respond more consistently to safety-related activities. This connected approach supports day-to-day safety programs while helping organizations maintain awareness of workers and equipment in the field.

## HONEYWELL SAFETY SUITE 2.0 SUPPORTS CONNECTED DEVICE MANAGEMENT, OPERATIONAL VISIBILITY AND COMPLIANCE TRACKING WITHIN A SINGLE SYSTEM

By bringing together device data, workflows, and reporting, Safety Suite 2.0 supports more consistent safety operations across teams and sites. Organizations can use the platform to manage portable gas detection programs, review performance data, and adapt processes as operational needs evolve.

### READY TO TRANSFORM?

You Contact your Honeywell representative today to learn more, request a demo, or start

your trial. Let Safety Suite 2.0 help you build a safer, smarter, and more efficient operation—because nothing matters more than protecting your people.
