

# **GAS AND FLAME DETECTION SERVICES**

**Honeywell**

# AVAILABLE APPLICATIONS

Gas detection products and solutions designed to protect your workers and your plant.

## COMMERCIAL

Gas detection from standalone units to fully engineered, multi-point systems, all offering cost-effective regulatory compliance.

- Parking structures
- Tunnels
- Chillers and refrigeration
- Mechanical rooms
- Office towers
- Commercial buildings
- Construction sites
- Shopping centers
- Swimming pools
- Golf courses
- Schools and universities
- Laboratories
- Hospitals
- Landfills

## INDUSTRIAL

Renowned gas detection systems with advanced electrochemical, infrared, and open path sensing technologies.

- Oil and gas
- Cold storage
- Water/wastewater treatment
- Chemicals
- Engine rooms
- Plastics & fibers
- Agriculture
- Pulp
- Printing
- Light industrial
- Steel mills
- Agriculture
- Livestock
- Marine
- Mining

## HIGH TECH / GOVERNMENT

A complete portfolio of gas and chemical detection instrumentation including infrared spectroscopy (MST) with no cross interference, to Chemcassette paper-based solutions (MDA Scientific) offering detection down to parts per billion.

- Semiconductor manufacturing
- Nanotechnology
- Photovoltaics
- Aerospace propulsion and safety
- Specialty chemicals industry
- Research laboratories
- Pharmaceuticals
- Emergency response
- Military
- National security
- Power generation

# TAILORED SOLUTIONS

Are you fulfilling all your legal responsibilities and commitments to your employees in health and safety?

## NEVER TURN A BLIND EYE TO SAFETY

Whether you are responsible for managing hazardous environments or securing your plant against gas risk, it's paramount to protect the health, safety, and welfare of your workers. It's your legal obligation to make sure that the employees are protected from anything that may cause harm, effectively controlling any risks to injury or health that could arise in the workplace. Failures to comply with these requirements can have serious consequences, including fines, imprisonment, and disqualification.

## ALWAYS IN CONTROL WITH TRAINED PERSONNEL

**Can you confirm that your life-saving gas detection systems are being correctly serviced by well-trained specialists? Are you confident that you are taking all the necessary safety precautions and that your paperwork is up-to-date and compliant with all industry regulations such as ATEX and OSHA?**

The decision to use novice operators or unapproved third-party service providers can have a strong negative impact on the health and safety of your employees. Furthermore, improper maintenance of your fixed gas detectors can cost you hundreds of thousands of dollars. That's why when you entrust your maintenance and service to qualified specialists you further guarantee that your company's investments are protected.

## EVEN THE BEST PRODUCTS DESERVE EXPERT MAINTENANCE

When considering a major capital investment, it is critical that ongoing maintenance along with any additional service costs are budgeted for. Investing in best-in-class products is not a guarantee for flawless operational performance so to minimize any downtime and avoid HSE risks along with any possible legal implications, it is important to ensure your safety systems are commissioned, maintained and supported by the Experts.

## MAXIMIZE YOUR UPTIME. MINIMIZE YOUR COSTS. BOOST YOUR CONFIDENCE

When you choose Honeywell to be your service partner, your investment is protected threefold. First, you have the confidence that our products would meet your expectations. Second, you have the confidence that the welfare of your production processes is protected. Third, you have the confidence that, in the case of an emergency, help will arrive as quickly as possible. Every Honeywell service contract is designed to help maximize your hardware uptime while minimizing your related costs and risks to your employees' safety.

# NEED RELIABLE SERVICE SOLUTIONS? MEET HONEYWELL

With over 50 years of experience in helping businesses to maximize operational safety and product uptime, Honeywell knows all the ins and outs of gas detection. We pride ourselves on delivering superior quality of support and engineering resources. This way we can ensure faster lead times and provide quick assistance. That's why so many of our customers have been with us for decades — because they know they can rely on us to be there when they need us most.

## YOUR SERVICE NEEDS, OUR TAILORED SOLUTIONS

Honeywell offers 4 categories of Service to meet the needs of any customer requirements.

START-UP AND COMMISSIONING	UNCONTRACTED SERVICE AND REPAIR	SERVICE CONTRACTS	ON SITE DAILY SUPPORT
Honeywell initializes, sets up, and configures the instruments	Customer requested on demand for any maintenance need	Honeywell schedules planned routine visits to ensure the factory recommend preventive maintenance is adhered to	Dedicated expertise on site daily to meet needs
Guarantees factory warranty acceptance and approved Start-up procedures	No commitment necessary but more expensive option and slower response time	Multiple options to ensure detectors are operating at peak performance	Uninterrupted support

## ENHANCED FLEXIBILITY, TOTAL CONFIDENCE

For your confidence and peace of mind, choose from Honeywell's convenient packages. Additional visits per year are available.
