

HONEYWELL SAFETY SUITE DEVICE CONFIGURATOR

Quick and Precise Management for
our Honeywell Gas Detector Fleet

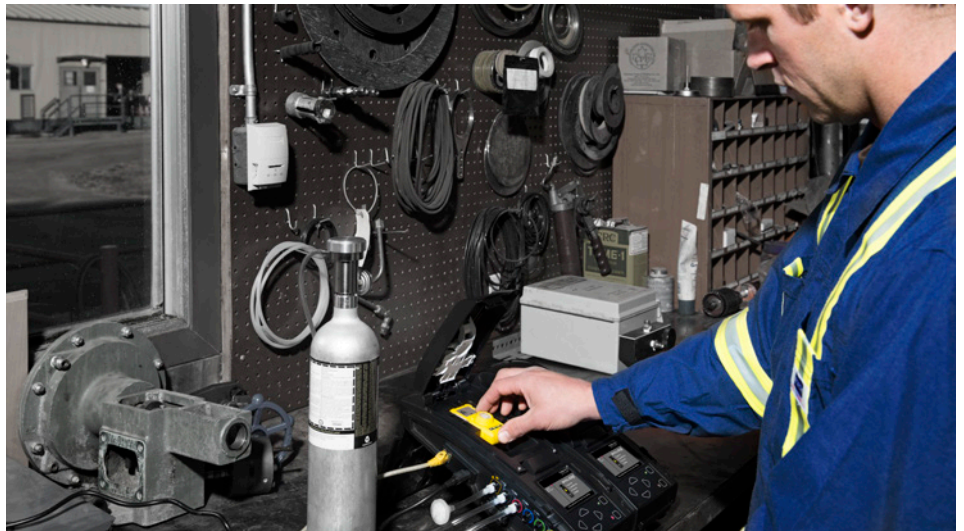

Honeywell

COMPLIANCE MANAGEMENT CAN ACTUALLY BE EASY

It's about time someone helped you to get organized by offering you a working solution to do it. If you are responsible for gas detector compliance management, you already know that collecting, analyzing, and reporting such information can be extremely time-consuming.

In your day-to-day work, you must ensure that workers **comply with government regulations** and corporate safety policies. As part of this compliance, workers must have equipment that has been **inspected for safety and training** that certifies them to complete certain tasks.

Maybe you're already **spending too much time performing administrative tasks**. Your current system – call it monotonous, dull, or repetitive – can keep you from getting out of your office, developing safety policies, or otherwise collaborating with operations to improve your working environment.

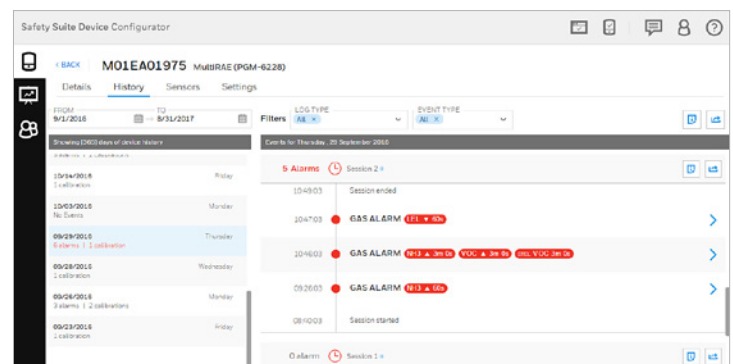

INCREASE YOUR PRODUCTIVITY

The **Safety Suite Device Configurator** software enables quick and precise management and maintenance of your Honeywell portable gas detector fleet – bringing Honeywell's RAE and BW product lines together for the first time.

As a Safety or Operations Manager, this is **your tool of choice to simplify** reporting and streamline administrative tasks.

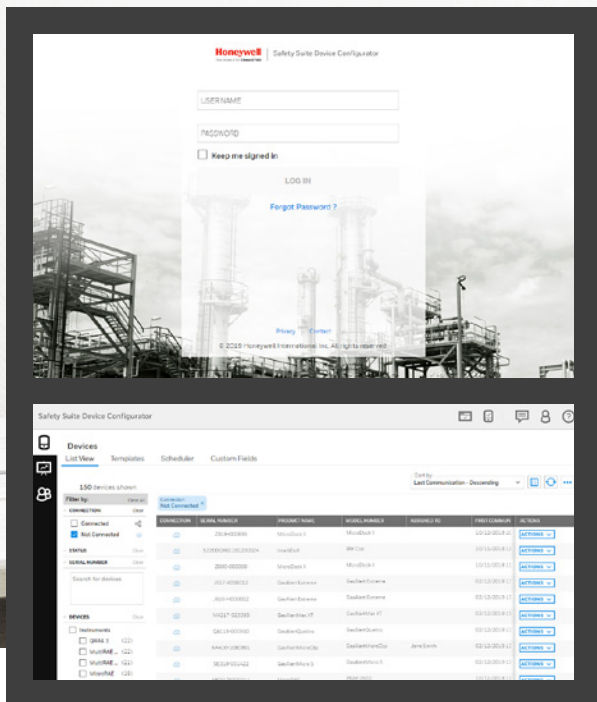

Its highly intuitive and user-friendly interface enables you to pull all the necessary data in an intelligent, effective, and time-saving way. Its **state-of-the-art technology** ensures that all the data is encrypted, minimizing privacy threats.

It's an easy-to-use software solution from Honeywell to increase your productivity.

OUR SOLUTION FOR YOUR HARD WORK

Honeywell Safety Suite Device Configurator enables you to manage your fleet of Honeywell portable gas detectors and docks with ease. It reduces the burden of administration and simplifies compliance so you can concentrate on keeping people safe.

Simple and Intuitive User Interface

- Consistent, clear, and concise user interactions.
- Minimal training and time is required to use the software.

Streamlined Device Management

- Increased productivity enabled by enhanced information abstraction.
- Intelligent incident investigation through centralized event reporting.
- Easier device configuration using logical data groups and templates.
- Reduced maintenance through streamlined firmware management.

Secure and Flexible User Management

- Managed access control for increased data security.
- Role-based access for information security.

Localized Data

- No dependence on external networks or infrastructure – software can be accessed at any time.
- Works in non-Internet connected workplaces.
- Minimizes data privacy concerns.

One Honeywell Brand Experience

- Compatible with both Honeywell BW Technologies and RAE Systems products.
- With Honeywell, you're partnering with a global leader in safety technology – for industries from space and defense to oil and gas.

SAFETY SUITE DEVICE CONFIGURATOR INSTALLATION

Hardware Requirements

CPU, 1.0 GHz or better

Color monitor (at least 1366 x 768 resolution, 16-bit color)

8 GB RAM

At least 4 GB of free hard disk space*

USB port for instrument/dock station connection

Intel® Wireless Bluetooth® Adapter for instrument BLE connectivity

LAN connection for network-connected dock stations

Optional Internet connection (to access Product Registration Module)

Software Requirements

Windows 11, Windows 10 64-bit version 1809 or above

Intel® Wireless Bluetooth® Driver: 21.60.0 or above

Microsoft® .NET Framework V4.6.1 or above (can be installed with Honeywell Safety Suite Device Configurator installation)

User Privilege Requirements

During installation, you must have administrator privileges on the local PC.

Note: Administrator privileges are not required in order to run the program from desktop.

Easy Data Transfer

By Ethernet or USB – from docking module to computer.

Refer to individual docks for specification.

* Software installation only. Honeywell Safety Suite Device Configurator may require significantly larger amounts of disk space to store device data and other software data.
