Modernize Your Control Systems With Momentum™ Embedded Services.

Cost-effective Alternatives for High-performance Conveyor and Sortation Control
Choose from five modular control solutions that enable you to use only what you need:

Embedded Routing

Source-to-destination management of conveyor and sortation systems. You'll get **real-time operational data** that enables **faster** and **better decision-making** and **reduces manual labor.**

Label Printing

Intuitive interfaces enable you to **easily track printer requests and information. Flexible storage and printing** of label data, **compatible with Zebra (ZPL)** and other major printing languages.

Alarms and Events

Real-time status, warning and alarm monitoring make it easy for your operational and maintenance staff to **pinpoint exactly where an issue has occurred.**

Historical Data Tracking and Business Intelligence (BI) Reporting

Self-maintaining archive enables **easy access to historical data,** assists **proactive maintenance, increases efficiency,** and **minimizes system failure.**

Visual Status Modeling

Easy-to-use, web-based overviews of your entire operation as it appears on the floor. Models **reveal each component's status at a glance,** providing a **valuable troubleshooting and training tool.**

Additional Benefits

Low Cost
Alternative to all-inclusive systems, making control systems **substantially more affordable** for most DCs.

Use Only What You Need
Modular design gives you **cost-effective flexibility.**

Easy Access
Web-based interface enables you to **log in from any computer** with internet access.

Increased Reliability
More reliable than third-party or homegrown customization. Delivers **high-performance conveyor and sortation control.**
Enable Peak Performance
Keep equipment running smoothly with **automated maintenance routines** that minimize unplanned downtime.

Easier System Management
Superior visibility of system resources and operations **gives you more control** and helps you **make better decisions.**

Troubleshoot Faster
Get **easy access to parts and maintenance information** when you need it.

Protect Your Investment
Modern, open-architecture design ensures your system **will meet your needs today and tomorrow.**

Easy Upgrades/Expansions
Seamless integration with other functions and services enables the system to **grow at your own pace.**
