

# PROTECTION FOR EVERY ROLE IN OIL AND GAS

**Different jobs. Different risks.  
One priority: protection.**

In oil and gas, every shift comes with high stakes. From drilling rigs and refineries to plants, terminals and rail interfaces, each role faces unique hazards that demand the right PPE, tailored head to toe for the job, keeping crews safe, compliant and ready for the toughest conditions.

## RIG WORKER

Handles heavy equipment and is exposed to falls, noise and high temperatures on drilling rigs

- Hard hat
- Earmuffs
- Fall protection harness
- Flame-resistant clothing
- Impact gloves rated for thermal and cut protection
- Safety goggles or face shield
- Steel-toe boots

## CONFINED SPACE ENTRANT

Enters spaces with limited exits and is exposed to toxic gases, oxygen-deficient atmospheres and physical hazards

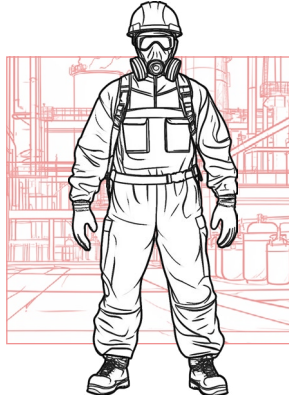

- Hard hat
- Earplugs
- SCBA or supplied air respirator
- Full-body harness
- Protective gloves
- Sealed goggles or face shield
- Steel-toe boots

## TURNAROUND TECHNICIAN

Performs maintenance and inspections in refineries and plants, often in confined spaces or near hazardous chemicals

- Hard hat
- Earplugs/earmuffs
- Full-face respirator
- Chemical suit
- Confined space harness
- Chemical-resistant gloves
- Sealed goggles or visor

## TRANSPORT OPERATOR

Handles loading and unloading of flammable or pressurized liquids and gases at terminals, truck bays or rail interfaces

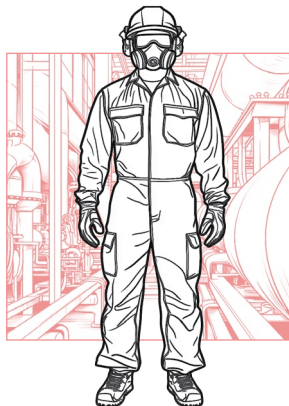

- Hard hat
- Earmuffs
- Dust mask or respirator
- Flame-resistant clothing
- Chemical-resistant gloves
- Goggles
- Metatarsal or chemical-resistant boots

## MAINTENANCE TECHNICIAN

Performs mechanical and electrical maintenance and is exposed to arc flash, slips and chemical hazards

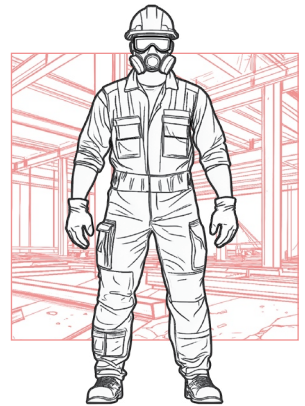

- Hard hat
- Earplugs/earmuffs
- Compact respirator
- Arc-rated clothing
- Electrical gloves
- Safety goggles
- Steel-toe boots

## HEALTH, SAFETY AND ENVIRONMENTAL (HSE) SUPERVISOR

Oversees safety and compliance across multiple work zones and ensures appropriate PPE usage

- Hard hat
- Communications headset or earplugs
- Compact respirator
- Flame-resistant clothing
- Protective gloves
- Goggles
- Steel-toe boots

From the drill site to the refinery floor, PPE is the common thread that protects every worker, every shift, every day in oil and gas. Outfitting crews with role-specific gear helps reduce injuries and keeps operations running smoothly, no matter the challenges.
