

# EMPOWERING THE WAREHOUSE WORKFORCE

Increase accuracy and speed with Honeywell Mobile Computers

## COST MANAGEMENT

### Honeywell Operational Intelligence

is a cloud-based software that allows you to see what's going on with every device in your estate. Features such as real-time tracking, device analytics and remote security updates can help you cut the costs of devices being out-of-action. Operational Intelligence also unearths in-depth analytics, which can help you to improve end-to-end workflows and address challenges before the impact productivity, further reducing your costs.

With consumer behavior changing rapidly, retailers and warehouses need to optimize their operations and make every sale a good experience. Accuracy and predictability are everything at a time when it has never been more important for warehouses to maintain or increase operating margins. Prioritizing operating margins gives warehouses more flexibility around the critical investment decisions which help future-proof their business.

Warehouses today can't afford to be constantly replacing hardware or be impacted by extended device downtime. That's why the Honeywell CK67 and CK62 mobile computers are ideal solutions for even the most demanding workflows in your warehouse operations.

### KEY FEATURES

Built on the Mobility Edge™ platform, a durable, stable and secure foundation to allow simplified configuration and deployment and help extend device lifecycle and security.

Built with the latest technology, including powerful processors for demanding applications, to improve warehouse workflows. They also leverage 5G and Wi-Fi 6E for secure, reliable connectivity.

Ruggedly designed to help them withstand heavy, daily use throughout warehouse operations. Offer powerful scanning through Honeywell FlexRange™ ULR scan engines, as intentional ergonomics to improve user experience.

## WORKFORCE CHANGES

The world's most advanced economies are all facing a persistent, increasing labor shortage in many key sectors, including retail, warehousing and distribution. Empowering the warehouse workforce with the latest handheld Honeywell devices (like the CK62 or CK67) not only increases accuracy and speed across the business, but greatly improves the user experience, leading to higher rates of employee satisfaction and productivity. This minimizes workforce churn, giving warehouses the confidence to invest in developing their people over time.

## SUPPLY CHAIN RESILIENCE

Building a resilient supply chain is critical to meeting rising customer expectations. Retailers are looking to improve operational supply chain efficiency, reduce vulnerabilities, and help ensure more agile responses to disruptions. To achieve this, they're looking for more from their warehousing and distribution centre partners.

The Honeywell CK67 and CK62 are ideal solutions for improving end-to-end supply chain accuracy. The powerful FlexRange™ ULR scan engine is reliable with superior performance in near and far scanning in warehouse operations

### CK67: PREMIUM DURABILITY FOR DEMANDING ENVIRONMENTS

- **Robust design:** withstands drops and tough environment including cold storage.
- **Superior connectivity:** 5G, Wi-Fi 6E, and dual SIMs for seamless data transmission.
- **Enhanced scanning capability:** 9th-Generation.
- **Extended reach and versatility:** Features FlexRange™ and FlexRange™ ULR scanner.
- **Long-lasting support:** Mobility Edge platform and 5+5+service ensures security and performance beyond 2035.
- **Future-proof:** 'Universal dock' future-compatibility accessory architecture.

### CK62: COMPACT DESIGN WITH CUTTING-EDGE TECHNOLOGY

- **5G ready:** Early adoption of 5G technology for high-speed communication and data transfer.
- **Versatile connectivity:** Supports WWAN (5G) and WLAN (Wi-Fi 6E).
- **Enhanced scanning capability:** 9th-Generation.
- **Extended battery life:** 7,000mAh battery for over 20 hours of operation.
- **Rugged and reliable:** IP65 sealing and compatibility with legacy products.
