

EasyParse for Motor Vehicle Documents

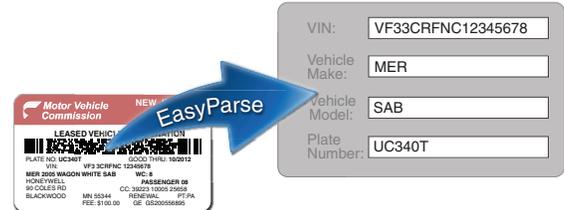

TotalFreedom Plug-In

Honeywell's EasyParse™ for Motor Vehicle Documents software plug-in parses bar code data found on US government-issued non-identity motor vehicle documents, such as vehicle titles and registrations, used by police departments, motor vehicle agencies, vehicle service centers and other organizations.

Powered by Honeywell's TotalFreedom® open-system architecture, EasyParse for Motor Vehicle Documents eliminates the need for host system software to process the encoded information contained within the bar codes found on non-identity motor vehicle documents.

EasyParse for Motor Vehicle Documents can be pre-installed on Xenon 1900, Xenon 1902 and Vuquest 3310g area-imaging scanners, as well as N5600 area-imaging engines, or purchased as a standalone upgrade. After installing the plug-in, a simple programming sequence enables you to transmit any of the available data fields in any order you choose. Separate fields by selecting any of the available delimiters.

When you enhance a Honeywell imager with EasyParse for Motor Vehicle Documents, you've just taken an important step toward achieving improved accuracy and increased efficiency.

Compatible with the following products:	
	Xenon™ 1900
	Xenon 1902
	N5600
	Vuquest 3310g

Features

- Eliminates Data Entry Error:** The average person makes one error for every 20 words typed—EasyParse for Motor Vehicle Documents eliminates these costly errors by replacing manually entered data with data extracted from the bar codes found on non-identity motor vehicle documents
- Automates Document Handling:** Improves administrative efficiency and customer satisfaction by reducing wasted time associated with document renewal, inspection and verification
- Offers Ease of Integration:** EasyParse for Motor Vehicle Documents is installed directly on the scanner, eliminating the need to make costly and time-consuming changes to the host system
- Provides Modularity:** Creates a more powerful solution when bundled with other Honeywell TotalFreedom™ plug-ins such as EasyDL

EasyParse for Motor Vehicle Documents

EasyParse for Motor Vehicle Documents can be used by a wide variety of organizations that utilize the data found in non-identity motor vehicle documents including:

- Police departments
- Vehicle dealerships
- Insurance processing offices
- Vehicle service centers
- Department of Motor Vehicles/Motor Vehicle Commissions

Extracts only the desired fields from the bar codes found on non-identity motor vehicle documents

Formatting Options

Typical Data Fields	First Name	VIN
	Middle Name	Vehicle Make
	Last Name	Vehicle Model
	Date of Birth†	Plate Number
	ID Expiration Date†	Number of Cylinders
	ID Issued Date†	Inspection Address
	Address	Odometer Reading
	Address1	Fuel Type
	City	Registration Expiration
	State	Carrier Name Registrant
	Postal Code	USDOT Number

† Date fields can be transmitted as MM/DD/YYYY, MMDDYYYY, MM/DD/YY, MM-DD-YY, MMDDYY or MM-DD-YYYY.

Field Delimiters Comma, Tab, Carriage Return, Dollar Sign, Caret, Semi-colon

Supported Documents

- Title Documents (TD)
- Vehicle Registration (RG)
- Motor Carrier Cab Car (MC)
- Motor Carrier Registration (IR)
- Vehicle (VH)
