

Application Brief

UNLOCK OPERATIONAL EXCELLENCE INNOVATE WITH THE CT70

Transforming Transportation and Logistics
Operations for a Competitive Edge

Honeywell

A NEW HORIZON IN EFFICIENCY

In today's competitive landscape, transportation and logistics (T&L) companies face numerous challenges, including skilled labor shortages, high operational costs, and the demand for rapid delivery cycles. The Honeywell CT70 mobile computer stands as a beacon of innovation, providing a powerful tool designed to revolutionize field operations and empower frontline workers. With its blend of rugged design, seamless connectivity, and advanced features, the CT70 redefines productivity and efficiency in the T&L sector.

ROBUST DESIGN FOR DEMANDING ENVIRONMENTS

Logistics operations are synonymous with challenging environments, requiring tools that are as tough as the tasks at hand. The CT70 is crafted to withstand the harsh conditions typical of T&L, from enduring multiple drops to resisting dust and moisture. Its robust build ensures operational continuity and reliability, critical for maintaining the pace in high-demand settings.

SEAMLESS CONNECTIVITY: EMPOWERING REAL-TIME DECISIONS

Connectivity is the backbone of modern logistics. The CT70 offers advanced connectivity options, ensuring that your workforce remains always plugged into the pulse of operations. With reliable 5G and Wi-Fi 7 capabilities, the device supports high-speed data access and seamless communication, essential for real-time decision-making and efficient supply chain management.

Frontline workers can tap into vital information quickly, enhancing their ability to respond to dynamic situations and customer needs efficiently. This level of connectivity not only boosts individual productivity but also contributes to a more integrated and responsive operational ecosystem.

EMPOWERING WORKERS WITH AN INTUITIVE EXPERIENCE

In the T&L industry, technology needs to enhance worker performance. The CT70 is designed with user experience at its core. An intuitive interface paired with a bright, high-definition display makes it easy to operate in various lighting conditions, minimizing downtime and training requirements.

The device's sleek yet rugged form factor feels as comfortable in the hands of delivery drivers as it does on the warehouse floor, offering unmatched ease of use. Whether facilitating parcel pickup and delivery, managing shipments, overseeing fleet management, capturing proof of delivery, providing navigation assistance or handling document entry, the CT70

streamlines tasks and empowers workers to focus on their primary mission: delivering exceptional service.

INTEGRATED SOLUTIONS FOR ENHANCED OPERATIONAL EFFICIENCY

Beyond its hardware capabilities, the CT70 is a gateway to numerous integrated solutions designed to enhance operational efficiency. This mobile computer works hand-in-hand with Honeywell's suite of software solutions, including Operational Intelligence and Smart Talk, to deliver deeper insights and seamless communication across your enterprise.

Operational Intelligence provides visibility into your asset usage and performance, helping to optimize resource allocation and reduce downtime. Meanwhile, Smart Talk unifies communications, offering features like secure messaging and push-to-talk that keep your team connected and informed.

FUTURE-PROOFING YOUR T&L OPERATIONS

In an industry marked by rapid technological advancements and changing demands, future-proofing your operations is crucial. The CT70 is built on the Mobility Edge™ platform,

designed to ensure longevity and adaptability. With planned support through future Android OS updates, businesses can rest assured that their investment is secure for years to come.

The CT70's architecture not only supports today's complex applications but is also ready for tomorrow's innovations, ensuring that your operation is always at the forefront of technological capability.

STRATEGIC BENEFITS: ADDRESSING CORE CHALLENGES

The challenges facing logistics and transportation are diverse, from managing labor shortages to ensuring cybersecurity. The CT70 directly addresses these issues by consolidating multiple functions into a single, efficient device. By reducing the need for multiple devices and platforms, the CT70 simplifies both IT management and employee training, driving down operational costs.

Moreover, its robust security features protect sensitive data against emerging threats, safeguarding your operations and customer trust. With the CT70, businesses can streamline workflows, optimize inventory management, and maintain a secure, efficient logistics chain.

EMBRACE A NEW ERA OF LOGISTICS EFFICIENCY

The Honeywell CT70 mobile computer is more than just a device; it's a strategic asset for transforming T&L operations. Designed to meet the unique challenges of the industry, it offers a compelling blend of durability, connectivity, and integrated solutions that empower your workforce and drive efficiency.

By choosing the CT70, transportation and logistics companies can enhance their competitive edge, reduce costs, and navigate the complexities of modern supply chains with confidence.

Discover the difference that the Honeywell CT70 can make in your operations. Contact us today to explore how this innovative solution can be seamlessly integrated into your business.
