

UNLEASH WORKFORCE POTENTIAL WITH HONEYWELL FUTURE-PROOF MOBILITY SOLUTIONS

START THE JOURNEY

Honeywell

SETTING A NEW STANDARD IN MOBILE COMPUTING

In a world where businesses must operate seamlessly, the technology driving mobility solutions has become increasingly critical.

Honeywell's mobile computing portfolio is designed to tackle the demands of dynamic environments in virtually every industry, from bustling warehouses and distribution centers to busy retail floors and dynamic healthcare settings. Our high-performing, rugged devices ensure productivity and efficiency across sectors. Whether it's handheld computers that deliver flexibility and durability

or vehicle-mounted computers that optimize workflows in challenging warehouse settings, mobile workers can trust Honeywell devices to deliver superior performance every time.

With a commitment to developing state-of-the-art solutions that fuse ergonomics, enterprise features, and durability – all while remaining cost-effective – Honeywell ensures businesses achieve operational excellence and a competitive advantage.

MOBILITY EDGE™ THE FOUNDATION FOR FUTURE SUCCESS

Devices based on the Mobility Edge™ platform are intended for businesses that invest in powerful solutions to gain competitive advantage. The Mobility Edge™ platform is a durable, stable, secure foundation on which to build these solutions. The platform enables a longer productive life, superior security, optimized performance, and accelerated deployments.

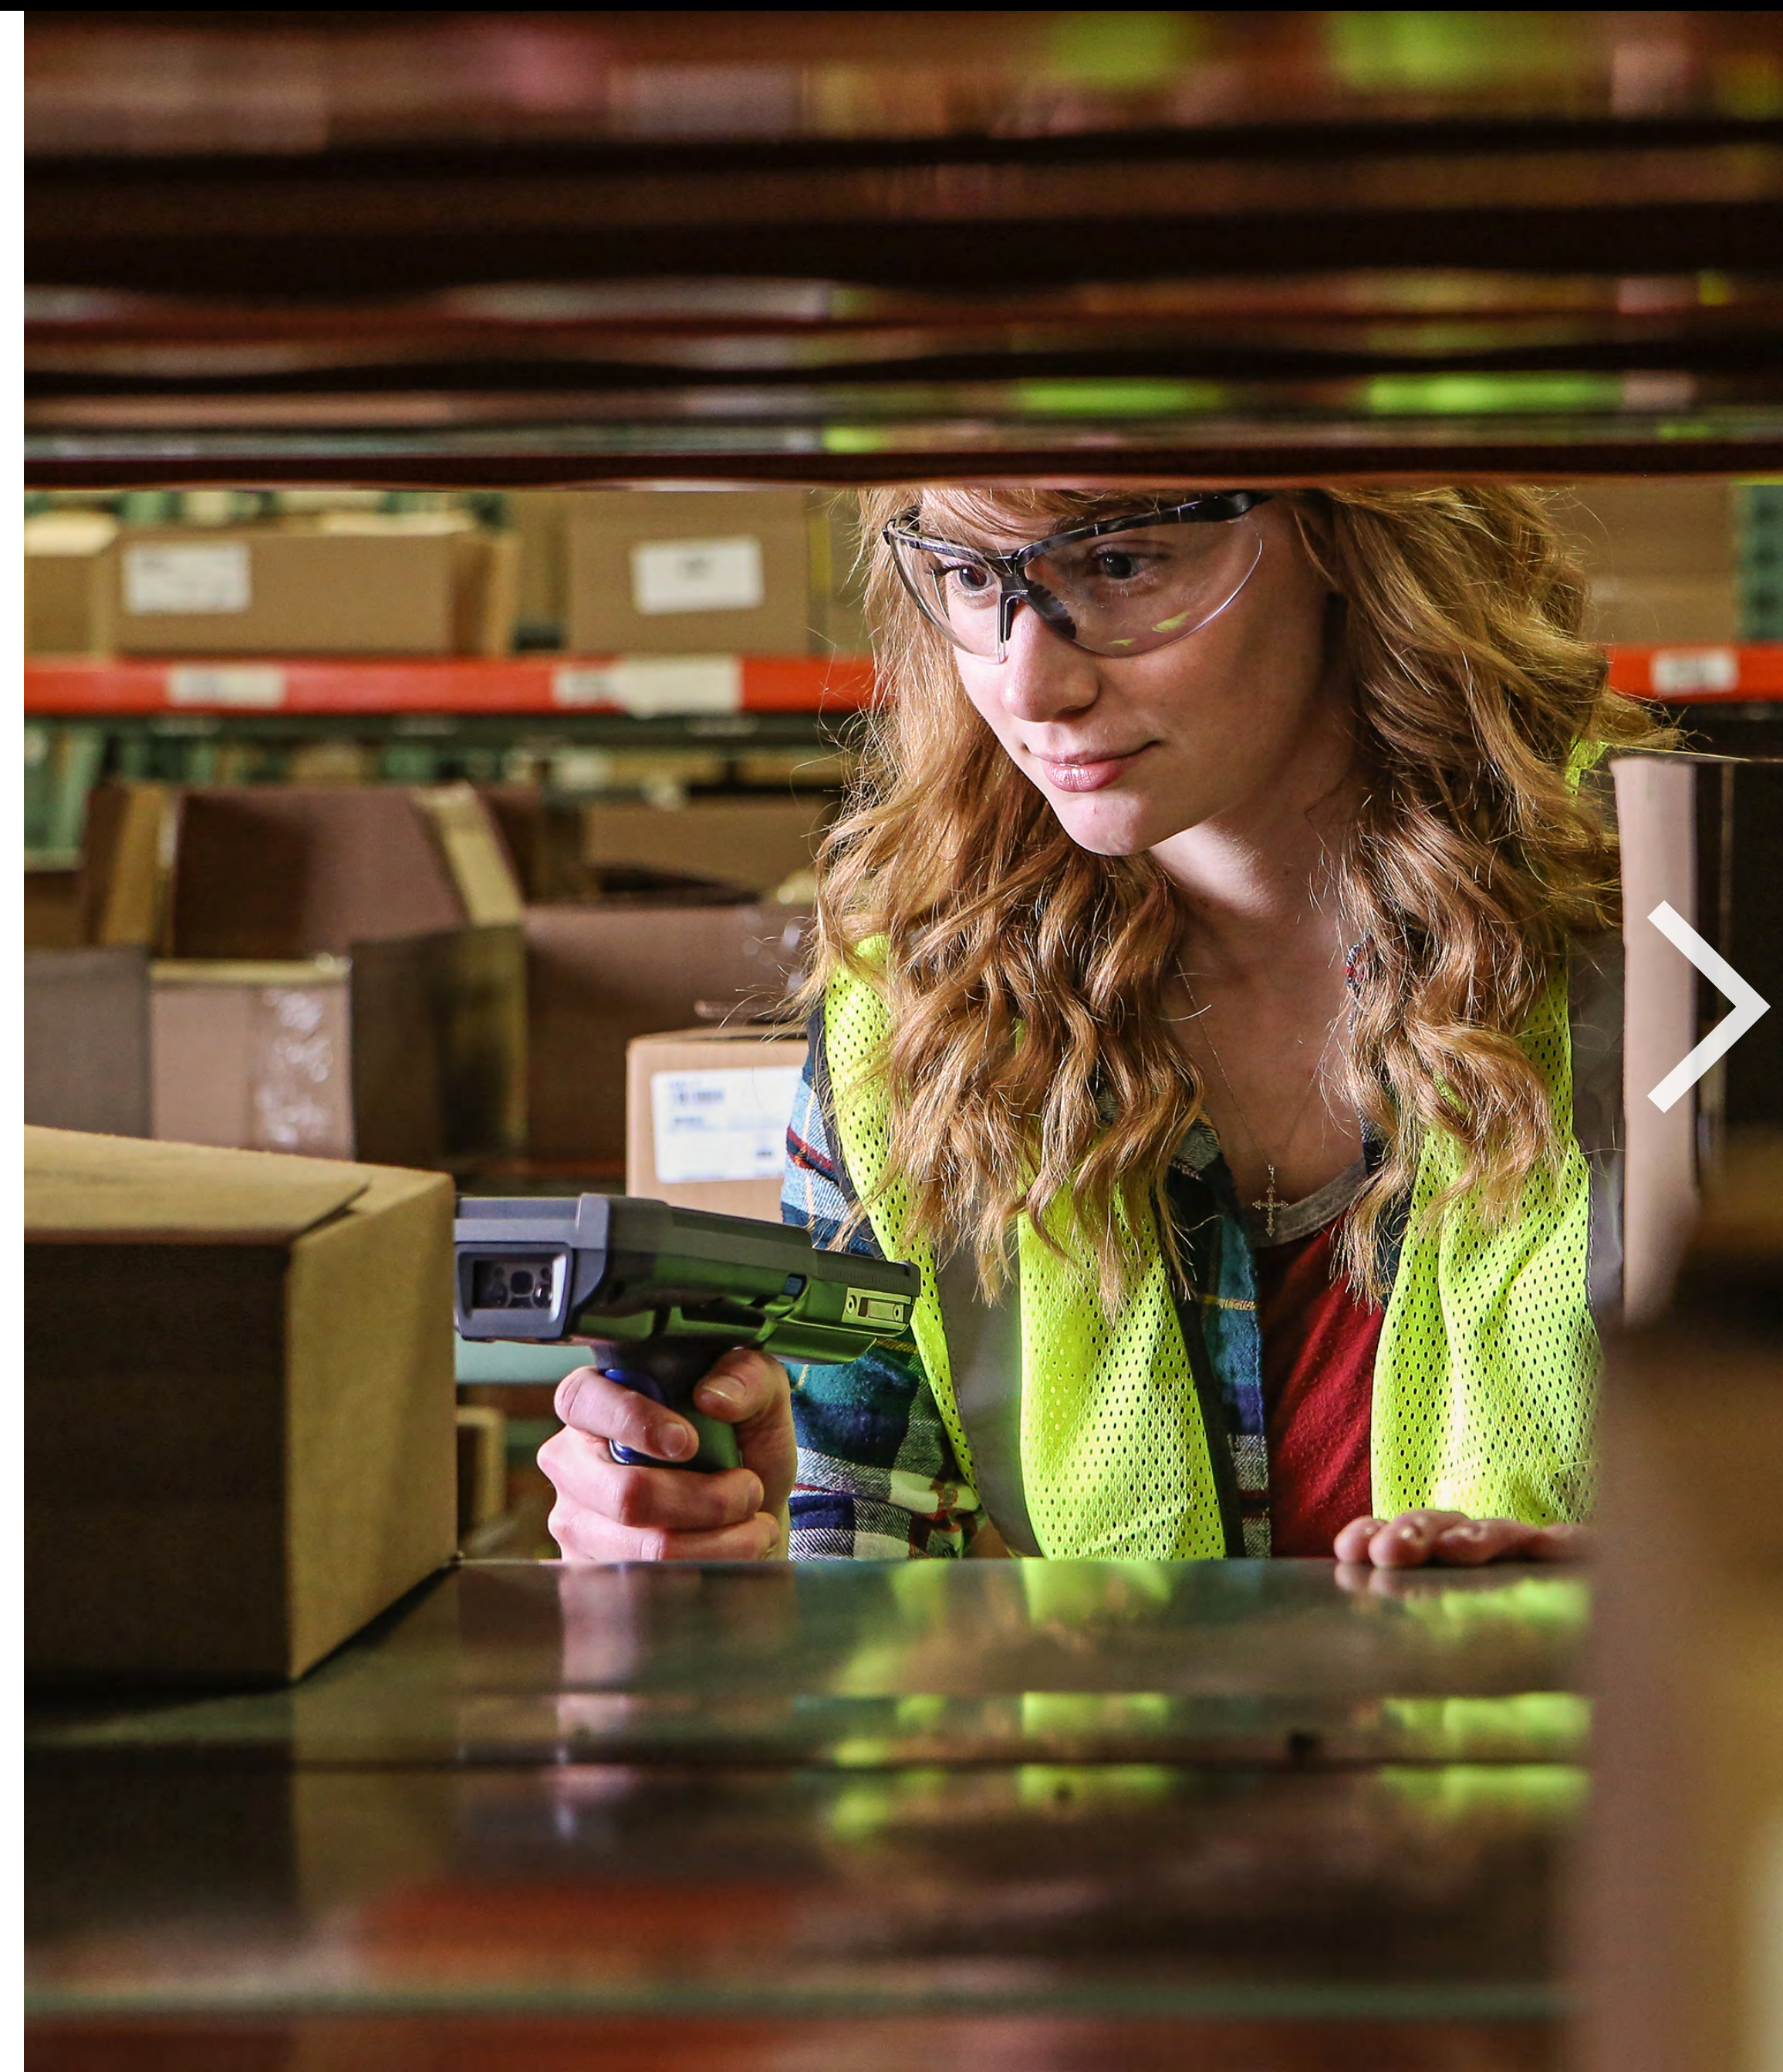

Honeywell's Mobility Edge™ Platform represents the ultimate in collaborative, scalable mobile computing. By standardizing development across devices, businesses can:

- Enjoy long-term Android™ OS support with a committed upgrade schedule for each device.
- Easily scale solutions to growing operational demands.
- Reduce deployment and IT management costs through a hardware-software platform featuring the same SDKs, APIs, tools and software ecosystem across multiple Honeywell mobile form factors and over generations.

KEY BENEFITS

1. Better device longevity through built-in update compatibility.
2. Improved business security through frequent and automated security patches.

Mobility Edge™ empowers businesses, ensuring a lower total cost of ownership and unmatched flexibility to support future technological innovations.

HANDHELD COMPUTERS POWER IN THE PALM OF YOUR HAND

Honeywell's handheld mobile computers are transforming the way industries like distribution, supply chain, retail and healthcare operate. Combining the agility of consumer devices with the durability and performance of professional-grade tools, our handheld computers empower companies to:

- Enhance productivity with tactile keypads and intuitive touchscreen interfaces.
- Enjoy seamless connectivity with advanced 5G and WiFi 7 technology, and Bluetooth® enabling always-on communication.
- Optimize workflows with high-performance solutions and a rugged design suited for demanding environments.

Whether your business needs lightweight, ergonomic devices for day-to-day retail operations, ultra-rugged tools fit for the rigors of warehouse and DC environments, or purpose-built solutions for healthcare, Honeywell handheld computers deliver multi-purpose utility in a compact package.

ENTERPRISE-READY TABLETS FOR FIELD WORKERS

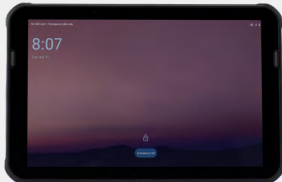

Honeywell’s tablets combine portability with powerful performance, offering edge computing capabilities for field operations, retail execution, and delivery workflows.

Built with exceptional versatility, these rugged devices provide field workers with real-time data capture, dependable connectivity, and robust battery life to carry them through long shifts.

Key Capabilities:

- Rugged, lightweight designs for use in demanding outdoor and indoor environments.
- Combined with the powerful, cloud-based, Operational Intelligence, IT leaders can empower operations with competitive advantage, high productivity and low TCO, all with a user experience that keeps frontline workers productive and engaged.
- Superior battery performance for uninterrupted usage through demanding shifts.

Honeywell tablets support business-critical applications ranging from route optimization in transportation logistics to field inspections and inventory management.

WEARABLE SOLUTIONS

HANDS-FREE MAXIMUM EFFICIENCY

Mobile workers can lose critical time using traditional handheld scanners and mobile devices. With Honeywell wearables, workers can keep their hands free, and their workflows streamlined.

Our lightweight, ergonomic, and durable wearable solutions are ideal for industries requiring highly agile workflows, such as postal sorting, retail replenishment, and inventory picking.

Top Features:

- Comfort-first designs to promote user adoption and reduce physical strain.
- Full accessory ecosystem to support different workflows
- 4” screen and function keys empowers users to efficiently manage various warehouse workflows, all within the convenience of a wearable mobile solution

Designed to thrive in high-volume operations such as parcel sortation, Honeywell wearables excel in timesaving and enhancing overall productivity.

ACCESSORIES UNIVERSAL DOCKING SYSTEM

Honeywell's Universal Docking system is a cornerstone of operational flexibility, offering businesses versatile charging solutions to streamline workflows.

Key Highlights:

- Future-proof design: Snap-in cup system supports new devices by swapping cups rather than replacing entire chargers.
- Multi-device compatibility: Options like quad chargers and 5-bay configurations allow power optimization and flexible setups.
- User convenience: Tools-free swapping ensures effortless integration.

The Universal Docking chargers embody Honeywell's commitment to scalable, cost-effective solutions—uniquely positioning businesses to adapt without hefty investments over time.

HONEYWELL MANAGED SERVICES

Honeywell's Managed Services empower you to deliver exceptional value to your customers by offering comprehensive support that goes far beyond our industry-leading products. Our most popular solutions include dedicated technical support, proactive maintenance, and expert consulting – all designed to keep customer operations running optimally and efficiently.

By ensuring seamless integration and reliable performance, these services help drive customer satisfaction, foster long-term relationships, and unlock new avenues for growth and innovation.

HONEYWELL SOFTWARE TO EMPOWER YOUR OPERATIONS

WORKFORCE INTELLIGENCE

Unite people, processes, and technology to deliver better visibility into onsite operations, allowing your maintenance and operations teams to make informed decisions in real time:

- Task management
- Incident response
- Workforce insights
- Enterprise integration

OPERATIONAL INTELLIGENCE

Honeywell Operational Intelligence is a SaaS solution that uses advanced insights and analytics to proactively identify operational issues, take action to provide solutions and improve ROI:

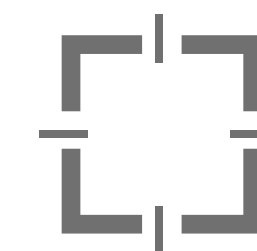

- Find missing devices
- Improve accountability with check-out/check-in feature
- Reduce worker disruption from battery issues
- Proactively monitor device data points for anomalies detection

SMART TALK

Honeywell Smart Talk is a unified, device agnostic workforce communication solution that tackles fragmented communication offering security and:

- Push-to-talk
- Voice and video calls
- Text and media messaging
- All in one application

SWIFTDECODER™

SwiftDecoder is a software development kit designed for integrating barcode scanning and optical character recognition capabilities into mobile and embedded applications:

- Batch scan
- Continuous scan
- High speed scanning
- Label capture
- Optical character recognition
- Augmented reality
