OVERCOMING MAINTENANCE AND INSPECTION CHALLENGES IN COMMERCIAL TRUCKING

Preventative maintenance processes are critical to operational efficiency, regulatory compliance, and workforce safety. Yet, human error remains a significant challenge—79% of industry leaders acknowledge that Maintenance & Inspection (M&I) errors contribute to unplanned downtime, leading to costly disruptions and potential regulatory penalties.

THE COST OF INEFFICIENT M&I WORKFLOWS

Without the right technology in place, commercial trucking faces:

- Underutilization of automated tools
- Inconsistent training for inspectors
- Increased regulatory fines and penalties
- Downtime that impacts rail operations and brand reputation

A study by Forrester® Consulting found that 77% of decision-makers believe inefficient M&I workflows hurt service reliability, while over 60% cite downtime as a direct cause of regulatory penalties.

THE SOLUTION

Guided Work M&I for Commercial Trucking

Guided Work technology transforms maintenance and inspection by providing step-by-step digital workflows, ensuring consistency, accuracy, and efficiency across trucking operations.

Fleet Maintenance & Compliance

Ensure truck uptime and compliance with automated, voice-guided inspections, reducing manual errors and optimizing asset utilization.

Commercial Dealership Service Operations

Enhance dealership maintenance workflows with structured processes to minimize service delays and improve regulatory compliance.

Automotive & Truck Repair Facilities

Streamline vehicle inspections and maintenance with hands-free digital guidance, improving adherence to safety regulations and reducing operational downtime.

WHY CHOOSE GUIDED WORK M&I?

Honeywell M&I is designed for the commercial trucking industry, including fleet management, commercial dealerships, and automotive service providers.

Discover how voice-guided technology enhances team efficiency, safety, and compliance:

- **Streamlined Documentation:** Efficiently document observations and findings while performing tasks.
- **Enhanced Compliance:** Adhere strictly to standard operating procedures for consistent technician actions.
- **Process Improvement:** Implement defined processes and gain actionable insights for operations.
- **Improved Safety:** Facilitate hands-free operations during inspections to enhance safety measures.
- **Faster Training and Technician Onboarding:** Simplified documentation and processes aid in training existing and new technicians.
- **Technician Retention:** An intuitive solution that boosts productivity and enhances employee satisfaction among technicians.

DRIVE OPERATIONAL EXCELLENCE IN COMMERCIAL TRUCKING

Don't let inefficient workflows slow you down. Implement Guided Work M&I solutions to streamline operations, enhance safety, and maintain compliance across your fleet and service network.
